## Avant Electronics – Counterfeit Elimination and Detection

As a responsible supplier Avant Electronics utilize various measures to ensure your product is supplied from a certified, approved source. We can supply new, current components with manufacturer labels and traceability – either on lead time or from stock. Or older, obsolete items to support legacy products.

Obviously when sourcing obsolete components, the challenge can become more challenging. With that in mind we're able to offer a range of countermeasures including–

Component/Black top inspection
Electrical Testing (via 3rd Party)
De-capping (via 3rd Party)
X-Ray (via 3rd Party)
Component Logging

Our experienced personnel, with a vast array of industry expertise and utilising the latest industry standards to assess and appraise supplied products to keep your supply chain rolling.

All this combined with a measured purchasing policy and insightful inspection practice have resulted in Avant Electronics becoming a favoured supplier to OEM's, CEM's and distributors across the UK and Europe.

Yours sincerely

J. Tyler
