Avant Electronics – Restriction of Hazardous Substances (RoHS) Statement

Avant Electronics specialise in sourcing hard to find and obsolete electronic components from a global network of suppliers for manufacturers throughout the UK.

We have built upon company values to help deliver quality products and a reliable service for obsolete and allocated component requirements.

We work closely with our Suppliers, reviewing all electronic components to the best of our ability to ensure they adhere to the RoHS Directive, but it must be noted that it is not always possible to guarantee compliance on items that have been discontinued for extended periods of time.

In these instances, it is our policy to locate and offer suitable alternatives.

Our Buyers continue to own the responsibility of providing detailed specifications for all components ordered from Avant Electronics and ensuring their suitability for each application and end use product.

Customer satisfaction is at the core in all we do, and we will remain committed to fulfilling customer requirements while ensuring compliance with all applicable Directives within the industry.

Yours sincerely

J. Tyler
